MASTER IN ENDOSCOPIC SINUS
SURGERY AND ANTERIOR
SKULL BASE
(Cadaver Dissection Course)
Mayo Clinic - Scottsdale, Arizona (USA)
October 8-11 2009

Course Director:
Paolo Castelnuovo, MD
Richard E. Hayden, MD
Piero Nicolai, MD

Faculty:
Stepen Bansberg, MD
Enzo Emanuelli, MD
Michael Hinni, MD
Namou Kim, MD
Chris Oliver, MD
This is a 4-day course for Otolaryngologists, Maxillo-Facial Surgeons, and Neurosurgeons who are interested in endoscopic sinus surgery. The course will be run in English and will summarize the experience of the Departments of Otorhinolaryngology of the University of Brescia and Varese (Italy) as well as of the Mayo Clinic at Scottsdale (USA). The idea of organizing this course comes from the availability at the Mayo Clinic of a brand new dissection laboratory with all the most updated technological facilities in terms of endoscopic equipment and connection with the operating theaters.

The programme will review through a step-by-step cadaver dissection all the techniques which are nowadays included in the armamentarium of the endoscopic sinus surgeon, from the very basic ones to the more advanced, which include access to the pterygopalatine fossa, infratemporal fossa, middle cranial fossa, cavernous sinus, anterior cranial fossa and the sella. A demonstration of all the techniques employed for duraplasty will be also included. The work in the lab, will be integrated with lectures, videos, discussion on clinical cases of special relevance, and live surgery sessions. A reasonable time for discussion during all the activities will be scheduled. It is our hope that through cadaver dissection, lectures, video demonstrations, and live surgery sessions participants might increase their knowledge on the most relevant contemporary concepts and surgical techniques in endoscopic sinus surgery.

The Course is articulated in 4 days, and it includes Surgical Anatomy Lectures and hands on surgical dissection in the laboratory.

In the morning from 8.30 to 9.30 lessons and video on surgical techniques and from 9.30 to 12.30 dissection in the laboratory

During Lunch Break (between 12.30 and 2.00pm) live video surgery will be projected.

In the afternoon, after completing the lectures on surgical dissection, dissection in the Lab will follow from 3.00 pm to 6.00 pm.

The participants will have the opportunity to practice under Faculty supervision the surgical techniques presented during the lectures.
