Organised by:

Welcome Message

Dear Friends & Colleagues,

We would like to invite you to the next edition of our annual event '11 Days of Facial Plastic Surgery', a set of 3 back-to-back courses that will be held from 6th to 16th November 2017. The first course that forms part of this event will be the '4th Singapore Advanced Rhinoplasty Fresh Frozen Cadaveric Dissection Course'. This exhaustive course builds on the foundations laid during the very successful and well-received courses that we have conducted over the last 3 years. The course this year has been enhanced further by incorporating the feedback from the participants and faculty from the previous courses.

The course comprises of two days of lectures and panel discussions covering the whole breadth of surgical challenges encountered during Rhinoplasty. Participants will learn practical tips on managing them safely, predictably and effectively. Structured panel discussions by our expert faculty will help delegates to consolidate their understanding of some of the common problems encountered during analysis, planning and execution of Rhinoplasty. The delegates will learn techniques to restore both the form and function of the nose.

The next two days will be devoted to surgical dissection on high quality imported fresh frozen cadaveric specimens to provide extensive hands-on training in a wide range of surgical techniques used in Rhinoplasty. The laboratory portion of the course will be limited to 10 Dissectors and 10 Assistants to allow for intimate supervision by experienced faculty. A unique feature of our course is **1:1 Dissector to Cadaveric specimen ratio**. State of the art surgical instruments will be made available to the delegates courtesy of our sponsor Storz.

We are fortunate to have internationally renowned Facial Plastic Surgeon Prof Shan R. Baker (USA) as teacher of honour for the course. Our international faculty includes Mr Ullas Raghavan (UK), Mr Gordon Soo (Hong Kong) and Dr Alireza Meshbahi (Iran). The participants will also benefit from the wealth of experience offered by our outstanding regional and national faculty in the field of Asian Rhinoplasty.

Singapore is a vibrant city with many historical and contemporary architectural landmarks. It is a culinary paradise; it offers richness and variety of experiences that will help you to have a memorable stay in our lion city. Travel to Singapore is easy as it is well connected to major airports around the world.

We look forward to seeing you at '11 Days of Facial Plastic Surgery'.

Course Chairman

Dr Sandeep Uppal PhD, FRCS (ORL-HNS)

Adj. Asst. Prof in Otolaryngology,
National University of Singapore

Senior Consultant Otolaryngologist
Trained in Facial Plastic Surgery,
Khoo Teck Puat Hospital, Singapore

Programme at a Glance

Day 1 and 2: Lectures and Panel Discussions

- » Contemporary Concept of Facial and Nasal Aesthetics
- » Surgical Anatomy of the Nose
- » Rhinoplasty: Preoperative Assessment
- » Perioperative Care of Rhinoplasty Patients
- » The Chin in Rhinoplasty
- » Cartilage Grafting in Rhinoplasty
- » Alloplastic Nasal Implants: When and Why?
- » Primary Rhinoplasty: Technical Pearls
- » Osteotomy: Principles, Techniques, Avoiding Complications
- » Nasal Hump Reduction
- » Management of Saddle Nose
- » Management of Crooked Nose
- » Middle Vault in Rhinoplasty
- » Management of Broad Nose
- » Tripod Principle for Nasal Tip Surgery
- » Suturing Techniques for Tip Modification
- » The Over Projected Tip: Analysis and Management
- » The Under Projected Tip: Analysis and Management
- » Customizing Rhinoplasty According to Skin Thickness
- » The Ptotic Tip: Reliable Techniques in My Hand
- » Over Rotated Tip: Techniques That Work for Me
- » The Boxy Tip
- » Managing Altered Alar Columellar Relationship
- » Alar Base Refinement
- » Short Nose: A Surgical Challenge
- » The Oriental Nose: Special Considerations
- » Rhinoplasty in Indian Patients
- » Rhinoplasty in Middle Eastern Patient
- » Complexities of Revision Rhinoplasty
- » Dorsal And Caudal Septal Deviation: How Do I Manage Them
- » Septal Perforation: Surgical Management and Personal Technique
- » Panel Discussion: Managing A Difficult Patient
- » Panel Discussion: Challenges in Tip Refinement
- » Panel Discussion: Secondary Rhinoplasty: Challenges and Pitfalls
- » Panel Discussion: Difficult Case Presentation

Day 3 and 4: Fresh Frozen Cadaveric Dissection

- » Conchal and Rib Cartilage Harvesting
- » Delivery Approach
- » Endonasal Approach to the Nasal Dorsum
- » Silicone Nasal Implant
- » External Approach: Raising the Skin and Soft Tissue Envelope
- » Dorsal Approach to Septum and Septal Cartilage Harvest
- » Component Hump Resection and Septal Cartilage Harvesting
- » Spreader Flaps and Spreader/Extended Spreader Grafts
- » Septal Extension Graft and Columellar Strut
- » Suture Techniques for Tip Refinement
- » Cartilage grafts to the Nasal Tip
- » Lateral Crural Strut, Butterfly, Baton and Rim Grafts
- » Lateral Crural Flip Over Graft
- » Dorsal Augmentation with Rib Graft/Diced Cartilage Fascia Graft
- » Medial Oblique, Intermediate, Lateral and Transverse Osteotomies
- » Silicone Chin Implant

Teacher of Honour

Prof Shan R. Baker
